Professional Summary

Detail-oriented Java Developer with a Bachelor of Engineering in Computer Science and hands-on experience in Spring Boot and REST API development.Strong in building secure, transaction-safe applications using MVC architecture, JPA/Hibernate, and centralized exception handling.

Technical Skills

Programming Languages: Java, SQL, JavaScript
Backend Technologies: Spring Boot, REST APIs, JPA/Hibernate, JWT Authentication, Microservices
Frontend Technologies: HTML5, CSS3, React.js
Databases: MySQL, MongoDB
DevOps & Tools: Git, GitHub, Maven, Postman, Docker, Jenkins (Basic), Eclipse, VS Code
Testing: JUnit, Mockito (Basic)
Methodologies: Agile, Scrum (Basic)
Core Concepts: OOP, MVC Architecture, Exception Handling, Transactions, API Security, Authentication, Validation

Internship

Java Full Stack Developer Trainee – Pentagon Space, Bengaluru Aug 2025 – Present

- Developing backend applications using Java and Spring Boot with RESTful APIs and layered MVC architecture.
- Implementing CRUD operations and transaction management using MySQL and JPA/Hibernate.
- Applying authentication, validation, and centralized exception handling to improve application security.
- Developing responsive UI components and integrating REST APIs using HTML, CSS, JavaScript, and React.js.

Projects

Smart E-Commerce Web Application Spring Boot, React.js, MySQL, JWT, Docker

- Developed a full-stack e-commerce application with JWT-based authentication and role-based authorization.
- Designed and implemented 10+ RESTful APIs for users, products, cart, and orders.
- Implemented exception handling, validation, and pagination for scalable API responses.
- Containerized backend services using Docker for consistent deployment.

Full Stack Banking System Spring Boot, MySQL, REST APIs

- Built a banking application supporting account creation, fund transfers, balance inquiry, and transaction history.
- Developed secure REST APIs and integrated MySQL for reliable data persistence.
- Implemented transactional operations to ensure data consistency.
- Followed layered architecture for maintainability and scalability.

Online Order Management System Spring Boot, Microservices, MySQL

- Designed a backend system using microservices architecture.
- Implemented inter-service communication using REST APIs.
- Applied centralized exception handling and transaction management.
- Used MySQL for service-level data persistence.

Education

Bachelor of Engineering in Computer Science and Engineering Nov 2021 - May 2025
Bapuji Institute of Engineering and Technology, Davanagere CGPA: 8.0

Pre-University (12th) 2019 – 2021
Malnad PU College, Shivamogga 75%

Certifications

Deloitte Australia Technology Job Simulation – Forage Dec 2025
Deloitte Australia Data Analytics Job Simulation – Forage Jan 2026
