GAGAN KUMAR S V

Shivamogga, Karnataka, India | gagankumarvanjre07@gmail.com | +91 9741249844 | linkedin.com/in/gagankumarsv | github.com/Vanjre07

PROFESSIONAL SUMMARY

Results-driven Java Full Stack Developer with hands-on expertise in building scalable, production-grade applications using Spring Boot, Spring Security, React.js, and Microservices architecture. Proficient in designing and consuming RESTful APIs, implementing JWT-based authentication, applying SOLID principles, and delivering CI/CD-enabled pipelines with Docker and Jenkins. Experienced across the full Software Development Life Cycle (SDLC) with a strong foundation in Agile/Scrum methodologies, JUnit 5 testing, and relational/non-relational database design. Eager to contribute to high-impact engineering teams with a commitment to clean code, performance optimization, and continuous growth.

TECHNICAL SKILLS

Languages: Java 17, SQL, JavaScript (ES6+)
Backend: Spring Boot, Spring MVC, Spring Security, Spring Cloud, RESTful Web Services, JPA/Hibernate, JWT, Microservices, API Gateway
Frontend: React.js, HTML5, CSS3, Responsive Web Design
Databases: MySQL, MongoDB, PostgreSQL (Basic)
DevOps & Tools: Docker, Jenkins, Git, GitHub, Maven, Postman, CI/CD Pipelines
Testing: JUnit 5, Mockito, Unit Testing, Integration Testing, Test-Driven Development (TDD)
Core Concepts: OOP, SOLID Principles, MVC Architecture, Design Patterns (Repository, Factory), SDLC, Agile/Scrum, @Transactional (ACID), Secure Coding, Performance Tuning, Exception Handling

PROJECTS

Smart E-Commerce Web Application

Spring Boot · React.js · MySQL · Spring Security · JWT · Docker · Jenkins · JUnit 5

- Engineered a full-stack multi-vendor e-commerce platform with role-based access control (ADMIN/CUSTOMER) using Spring Security and JWT, ensuring end-to-end API security across 20+ RESTful endpoints.
- Optimized backend performance through JPA query tuning and pagination, reducing average server load by 25% and improving API response time by 15%.
- Applied the Repository design pattern for modular, testable data-access abstraction; achieved 70%+ service-layer unit test coverage using JUnit 5 and Mockito.
- Containerized the full application with Docker and automated deployments via a Jenkins CI/CD pipeline, reducing manual release effort significantly.

Full Stack Banking System

Spring Boot · Spring Security · MySQL · JPA/Hibernate · RESTful APIs

- Developed secure, role-based banking workflows — including fund transfers, balance enquiry, and transaction history — across 3 account types using Spring Boot and Spring Security with full secure coding standards.
- Enforced ACID-compliant, rollback-safe transactions using @Transactional annotations; optimized relational schema through strategic indexing and normalization, cutting query execution time by 30%.
- Designed and exposed 15+ RESTful APIs with comprehensive input validation, error handling via @ControllerAdvice, and clean separation of service and persistence layers.

Online Order Management System (Microservices)

Spring Boot · Spring Cloud · API Gateway · MySQL · JUnit 5 · Mockito

- Architected a cloud-ready microservices ecosystem with 3 independently deployable services — Order, Product, and User — enabling independent scaling and fault isolation.
- Implemented REST-based inter-service communication and configured Spring Cloud API Gateway for centralized routing, load balancing, and cross-cutting concerns.
- Applied @ControllerAdvice for unified global exception handling across all services; achieved 70%+ unit test coverage with JUnit 5 and Mockito to ensure reliability.

EDUCATION

Bachelor of Engineering — Computer Science & Engineering *2021 – 2025*
Bapuji Institute of Engineering and Technology, Karnataka CGPA: 7.5 / 10

CERTIFICATIONS & TRAINING

- Java Full Stack Developer — Pentagon Space Trainee Program (January 2026)
- Technology Job Simulation — Deloitte via Forage (January 2026)
- Data Analytics Job Simulation — Deloitte via Forage (December 2025)
